Selection of technology tools is a critical component of an effective Sourcing Strategy.

One size DOESN'T fit all - organizations have different needs and preferences.

Optimization

Guarantee Best Total Value by Casting a Wider Net and Using World Class Bid Gathering and Bid Analysis Tools

What is "Optimization"?

- 1. The process of collecting and evaluating supplier proposals to arrive at the best possible sourcing solution that meets all the buyer's needs. This process reaches out to current and prospective suppliers encouraging all to be creative and innovative.
- 2. The use of state of the art computer based tools that give suppliers an online platform for submitting proposals in a "non-auction" environment and enabling buyers to thoroughly evaluate hundreds or even thousands of potential supply matrices.

Two features work together to deliver breakthrough sourcing results:

- Expressive Bidding enabling and encouraging suppliers to propose alternatives and make conditional offers
- Scenario Analysis evaluation of all supplier input including Expressive Bids under an <u>unlimited</u> number of possible sourcing combinations and "what if" conditions while clearly quantifying the cost impacts of each option considered.

Whether your supply matrix is complex in terms of number of suppliers, number of items, number of using locations or <u>all of the above</u> this approach can deliver for you. For example, think of having dozens of suppliers bid on hundreds of items...we did and helped save our client over 25%!

Paladin's Center of Excellence in Optimization can help your organization analyze spending and customize an approach that best meets all your quantitative and qualitative needs and insures best possible value.
